

Nice Stuff/Compliments	Format/Meet operations	Facility	Equipment/Technology
Good rest area, good deck,	Please reconsider the order of events. Having all sprint butterfly events and the 100 freestyle on the same day for some age groups was a terrible lineup- many kids who qualify for the 50 fly also swim the 100 fly and are decent sprint freestylers as well (and often pretty good at the 200 IM, which was also that day). When it's a 4-day meet, the stroke events should be spread out to be on different days (50, 100, and 200 each on different days).	improve pool water condition	walkout songs
Love the space around the pool and the parking, always a plus	it would be nice to have consolation finals in addition to finals. Traveling that far for a slim chance to swim twice is a bit of a bummer.	pave the unpaved parking lot	Score board did not work for last day of finals ans relays
It was a great meet, and my 10 yo swimmer had an amazing experience for her first Far Westerns	There were often not timers, and swimmers had to risk relying solely on the touchpads.	Better viewing area for spectators	
From the bottom of our hearts than you for having us from Canada. We were so grateful for the warm welcome and everyone was so friendly. This was our first trip to the USA and we found kind an patient people everywhere we went. Thank you for having us.	Two finals for 11-12 and 13-14 events	Bigger warm up/ warm down pool.	
SCSC always runs a good meet. They get all the information up on their site.	Or split the age groups to different pools or weekends.	Better water quality	
the meet ran smoothly, punctually and was well organized.	finals athlete callouts/walkout songs like in the past	better warm up/down facilities	
The meet was well run this year. Everything went smoothly.	2 heats of finals for every event! Announcing Finalists	The water quality was really bad the first few days of the meet	
Great meet overall. Morgan Hill good location with lots of nearby lodging and restaurants. See you next year hopefully.	Combine 15-16 and 17-18 heats to reduce timeline and fill heats. Empty heats take away from the championship meet feel. It shouldn't be super hard day to make finals as a 15-18 and hard as a 14u. Everyone should earn finals.	it was hard to see the wall. Honestly one of the murkiest pools I have seen.	
The people are lovely - overall a good experience.	Allow more rest with shorter sessions. Reducing the 15-18 heats would help 14u have shorter timelines.	better warm up/warm down pool	
This was by far one of the most enjoyable experiences I've had as an official. The tone was relaxed and yet professional, and everyone kept that tone running through Sunday night. Seemed like everyone was happy and just focused on running a great meet, and that helped make it fun throughout as well.	Improve scratch policy. Initial emails received were confusion if it was the first or second Saturday for deadline.	at a championship level meet the blocks should have wedges	
	Would be super nice if distance swim placements could also be announced during finals.	A better area like bleachers for spectators to watch	
	Assigned warmup times to reduce congestion	Cleaner water.	
	Monitoring of warmup cool down pool to make sure athletes are able to get proper warm up cooldown.	long course warm ups the day beforehand.	
	consolation finals	female bathrooms didn't have toilet paper the first day,	
		for finals keep the end scoreboard to reflect the lanes in the correct order and do not change to reflect the order in which the swimmers finished as it was confusing	
	Host team to provide timers at finals	More/healthier food options for the kids	
	making the meet more exciting with walk out songs for finals.	Our athlete found the cool down pool too crowded with kids socializing and goofing around to be able to complete a proper cool down.	
	The meet needs to be moved forward by at least 1 week.	It was tough to get a grip on a few of the starting blocks	
	I still believe there should a restructuring to have a consol heat and one bonus event.	The warm-up / cool-down was a mob scene during prelims	
	Santa Clara and the officials and admin do an incredible job	more spectator space	
	Complete meet program information before the meet	misters to keep swimmers cool	
	Don't reseat events right before people swim it	more restrooms for spectators	
	did not seem to be any safety marshals to monitor areas.		
	Timeline for distance was too long (ideas - offer 1500s on Wednesday afternoon; do not allow swimmers to qualify due both the 800 & 1500 with a single cut.)	Better blocks	
	400 Free and 400 IM swimmers should have to provide their own timers.	Need a much bigger warm up pool.	
	Opening dive lanes when coaches ask	larger warm up pool	
	The meet is better held at the Concord Community Center.	larger women's bathroom	
	The smaller teams never get asked to time any lanes and the bigger teams always carry the weight	No one was marshalling the WD area.	
	If dedicated 10&U space is allocated for warm-up, there needs to be somebody present at all time enforcing this.	Providing coaches tables	
	I had to provide the actual lap counting equipment for the distance was unbelievable to me.	The water in the competition pool and warm up pool needs to be cleaned. It was so disgustingly dirty that a lot of swimmers said that they couldn't see three feet in front of them and the taste was foul.	
		Adyen Tan put a towel on the blocks to prevent himself from slipping while starting off the blocks. (This gave him an unfair advantage, but for safety reasons how can one fault him? I just wish all the children had been allowed to do it.)	
		multiple stroke/turn officials gave conflicting directions around filming at the side of the end of the pool.	
		1. Clear water conditions 2. Better warm down 3. Clean pool	
		No snack bar?!	
		10&U water up warm down lane not monitored and occupied by older kids pretended to be 10& under.	
		Meet mobile results up quicker/scratch notices quicker	
		I would bring in bleachers for spectators	
		There is no spectator seating. This makes it impossible for grandparents or handicapped persons to see.	
		more water station	
		Very bad water and not so good block	
		The overcrowded warm down pool was unsupervised	
		There simply wasn't enough space to allow for safe conditions in warm up pool
