

	Nice Stuff/Compliments	Format/Meet operations	Facility	Equipment/Technology	Officials	
	Very nice run meet	This meet should be Four full days Spread out the distance over four days	More food options on site	Timing failure in 50 free	Mary Russell [sic?] should not be allowed to officiate.	
	Athlete bag tags	Meet took too long, we need raise time standards to reduce the entries Scratches should NOT be emailed - it is too slow to sort and takes too many people. A google form that connects to a google sheet that can be sorted by athlete name and event would work. If the form is "viewable to anyone" than coaches can see if their swimmer scratched or if they need to submit themselves.	Parking was good - didn't want to pay daily	Fix computer issues quickly	S/T officials missed obvious DQs (e.g. double dolphin kick at BR pull-down)	
	very well run and deck marshalls were excellent with keeping the deck safe and spectator free		Adult bathroom ran out of toilet paper each day bleach was temporarily added to the warm-up pool, causing a pause warm up pool and raising safety concerns.	Errors on Friday with touchpads	It was very inconsistent and not very fair calling false starts	
	I appreciate the hard work of the Neptunes	Should allow scratches day-of. Sessions all very long and 1500 heat sheets were posted way too late forcing athletes to arrive back sooner instead of getting rest after prelims	The warm-up pool had no event and heat display,	Strobe light was difficult to see	Mary did a great job as meet referee.	
	Excellent scoreboard - loved the splits			Meet Mobile on Sat/Sun		
	It's very good there is a sign for 10U only lane	It is unfortunate that no splits could be obtained for 1500, but this is better than the alternative of having running a much longer distance session	No displaying board in warm up area	Starter blocks were hard to adjust.		
	Without a doubt one of the most well-run AGCs we've experienced. Plenty of coaching space, easy flow for the swimmers, and compared to recent meets plenty of spectator viewing. I cannot tell you how disappointing it has been historically to spend \$1000s of dollars on hotel and travel as a parent, and have no ability to watch your child actually swim due to set up design. This experience was completely different, and should be set as the gold standard.	Confusion on circle or straight swimming for 1500 When they did "chase" it became so chaotic as the announcer was calling the heats too quickly to the points that on slower lanes kids were approaching too quickly to slower swimmer from the event prior.	10&U Lane signage not effective		the meet mobile system was a mess. That caused confusion and certain level of anxiety for the swimmers.	
	Starter was great.		10&U WU Should not take up 3 LCM lanes	no Meet Mobile was a bummer Event on meet mobile was changed unannounced on Day 2 the Saturday morning - very confusing for swimmers and coaches		
	Score board was quite good - nice to see names and splits	400IM and 1500 free are scheduled back to back on Day 3.	Warm-up pool too warm. Got chemical burns			
	Deck marshals were polite while maintaining security.	sharing lanes in 1500M is really tough.	Boys locker room was closed.	Meet mobile - seeding changing		
	i heard many parents said they had literally no complaints about the meet and how it was perfect Overall, it was spectacular. One of the better set up meets we've traveled to in a while.	the scratch process was challenging. Would be great to have a standard form (like spring FW at 9:30) to submit rather than going through coaches in free format. No freestyle events on Sunday except 1500	No clear signs to pay for parking Score board was a mess, the times for some of the events were inaccurate	Meet mobile not updated. Reseeding into another meet is not necessary. The results in meet mobile were quite delayed.		
	Overall this was a great meet. The facility was awesome. Appreciate all the efforts from the hosting team and official team!	Move 1500 to Thursday afternoon	Inaccurate in Providing parking locations that results of having a parking ticket The space between the pool and the bulkhead was a hazard and I wish more had been done in advance to warn swimmers. We had two injuries among a group of 17 swimmers, that's more than 10%.	Meet Mobile entry was completely changed on day two without anyone knowing.		
	Thanks for a great meet.	timeline too long cooked coaches and swimmers by the end				
	It was so much fun!	it was way too long each day for these 14&under kids! The scratch system was awful. Relying on coaches to scratch athletes for this many swimmers is ridiculous. Make it possible for either the athletes to scratch themselves at the scratch desk or make it an online form for parents or coaches to fill out	Difficult to turn at bulkhead end due to shallow water			
	This meet was fantastic! Location was perfect. Well run and organized. My child was very content on the fact that everyone had plenty of space to setup. Overall the meet was great. The facilities were amazing and very clean. host team was nice and helpful.	Sunday finals start too late - people don't get home til 10 Order of distance events needs changed - possibly to Thurs PM	My child fell into the gap between deck and the bulk head The starting area on the even side (diving board) has those metal bars that sticks out parking costs, etc. complicated and difficult			
	The deck was well-organized		some bulkhead safety issue with open threshold.			
	the hospitality was great Crew running the officials was excellent and kudos to them. was impressed with officials crew	The scratch procedure was very problematic I like that the meet was pre-seeded.				
	This meet was awesome!	Print out meet entry sheets for each swimmer, each day - give coaches 45 min to return to scratch table with all of team's scratches - Middle Atlantic procedure Was not happy with having to split the lane during the 1500M. The athlete sharing the lane with mine was not able to stay on her side and had hit my daughter on the head, arms and legs numerous times. There were also a number of near head on collisions. Completely unsafe and am surprised it was not a safe sport consideration. Had the meet sheet let it known the event would be swam lane split, i would not have signed my child up.	I was unprepared for the lack of hospitality and food available at the event. There was no healthy food or vendors at the event			
	Thank you for ALL you do!		Could not hear announcer on baseball field			
	Very well run meet, with a lot of convenience. Parking was easy (event at 10am!), hotel was affordable, and the pool was gorgeous. The grass field we were on was very nice and easy access to the pool.	Warmup was frustrating. Dive lanes took too long to set up. last day no bkstk ledges in dive lanes at other end, for 200 bk that day				
	The officials were great. Meet organisers were responsive Excellent snack bar and lots of area for athletes to set up. Having vendors at the meet was great, too. It was such a fun meet! love it <3	athletes could not see the event numbers/heats from the warmup pool some chase starts not timed well	should have provided water to the timers under such hot weather. The toilets were dirty and out of paper the 1st day of the meet more service for the bathrooms and trash			
	I thought Santa Rosa did a great job hosting and I liked the venue a lot.	No Call Rule enforced with crowding behind blocks and unable to hear announcement (recommends only enforcing no-call rule for 13&O)	have a speaker or announcement system outside the gates to hear what event they were on			
	Overall the meet was on point. Kids were happy!	the event line up needs to be balanced more - timelines too long - offer 1 distance event 4 day meet (or at least 3.5 day meet) A and B finals should return each evening. Team scores should be available and also highlighted throughout the meet. 400 medley and 400 free relays for 9-10's should be added 400 medley and 800 free relays for 11 & overs should be added				
	I liked the way the marshals handled things and kept nosy helicopter parents out of the block area. It was the best part of the meet. Parents are WAY too involved at the blocks sometimes.	Too many pre-meet emails an scratch box details nonexistent or lost in the clutter				
	Mostly well done, thank you for asking.	Meet ran far too long. Never host summer AGC in an 8 lane pool again.				
	I thought the host team did a great job hosting!	Running 2 people per lane in 1500? Running until past 8pm on Sunday night? These made an already long trials finals day just tortuous. Consider a 4th day in the summer. Consider running distance on Thursday night. Remove some relays, or run finals on both ends. 13 hour days on deck is too much.				
	The meet was very well run. Santa Rosa did a spectacular job hosting this meet.	Finals started too late. Especially on Sunday night. the Sunday distance events were disorganized. Athletes warmed up based upon timeline only to be left waiting extra 50mins for the actual start of the first heats. the 1500 was disappointing with split lanes, there should have been an email communication for clarity on the What and Why, allowing people a chance to scratch for safety or nonoptimal race conditions The scratch process was better at the spring and summer AG meets and coaches would prefer the online form for coaches/athletes/parents vs coach only. There was no communication on the scratch process or lists given of who needed to scratch. Athletes and coaches were confused on the first day scratch process. The scratch deadline was during commute traffic times for families trying to get to the meet. Pre-meet communications need to be consolidated and sent out with all info in fewer emails. This meet needs to go back to the Age Group Committee for revision. The meet needs to be two venues for summer. The timelines are too long. Ask Santa Rosa to host again. Zone 1 South bid to host next year without buy-in from teams in Z1S and no perimeters on how this will be executed. Santa Rosa did an excellent job running the meet.
