

2607ALAG01 – LSC Hy-Tek Championship Meet Software License

Motion to spend \$1758 initially and \$500 annually thereafter to purchase and LSC Hy-Tek license that can be used by all LSC meet hosts and Administrative Officials and funding for the Software line item of the budget to be increased by \$1758 for the 2026-2027 year.

Rationale: Pacific Swimming hosts multiple championship format meets throughout each calendar season. Teams bid to host the large meets that are the pinnacle of competition for both our age group and senior swimmers. These meets include three Senior II trials and finals meets open to Pacific and other LSC swimmers, three seasonal Age Group Championship meets for our Pacific swimmers, as well as Spring and Summer Far Western meets, which are also open to swimmers from all over the world.

To help monitor the meet and its many facets from the meet announcement, meet referees and meet administrative officials now use a meet backup from the computer operator to run reports, including timelines and time verification issues. Meet entry reports are printed to assist with the enforcement of the rules established by the meet announcement. Hy-Tek operates by licensing to teams, but it can be made available to our LSC. Clint Benton reached out to Hy-Tek about the requirements to be given a license to use for our large LSC meets so that our officials and teams could use the multi-user license with all the add-ons we need to run the meet smoothly.

I have included the information regarding our responsibilities and requirements to be issued a license to be used by Pacific Swimming. The benefits for our swimmers, teams, coaches, and officials would be well worth the expense as it would allow for teams that might not have the multi-user license bid to be part of the process. The initial start-up cost is listed below:

Quantity	Description	Delivery	Price	Total
1	Swim MM 8.0 Version Support Package	Web	\$ 20.00	\$ 20.00
1	Swim MM 8.0 Network Option	Web	\$ 495.00	\$ 495.00
1	Swim MM 8.0 Start Up	Web	\$ 349.00	\$ 349.00
1	Swim MM 8.0 Timing Console Interface	Web	\$ 295.00	\$ 295.00
1	Swim MM 8.0 Entry Cards/Labels Option	Web	\$ 99.00	\$ 99.00
2	Swim MM 8.0 Site Organizational Yearly Subscription	Web	\$ 250.00	\$ 500.00
			SubTotal	\$ 1758.00
			Shipping	\$ 0.00

Total \$ 1758.00

The annual renewal cost would then be \$500 to keep our license current. The requirement to receive this license would be the initial payment as well as our annual renewal and we would need to include the Hy-Tek logo on our website. The license would be given in the name "Pacific Swimming LSC".

I respectfully ask that the Pacific Swimming Board of Directors consider this purchase to allow the swimmers in our LSC and those swimmers attending our Pacific Swimming hosted championship meets to have the best experience possible. Allowing teams to use the LSC license of Hy-Tek with all the add-ons needed to run the meet in multi-user mode with the relay card and award labels option would allow for each meet to have access to the same Hy-Tek system and would allow for our organization to pull reports with accessible data by both our Pacific Swimming staff as well as those volunteers tasked with running a meet for the swimmers.

I would like to suggest that the money needed for this project be added to the budget in the Software section that already exists. I know that this expense will be something that we have not incurred before but it will allow us to advance our meets in an increasingly digital world. A smooth-running meet benefits all swimmers who participate. It is a bonus that our teams, coaches and officials will have access to the meet data on an organizational level with this license.

Thank you for your time and consideration for this request. Please reach out to me at agonzales@pacswim.org if you would like additional information.

Sincerely,
Amy Gonzales
At Large Board Member
